

1567 TORX® BO ESD Kraftform Micro screwdriver for tamper-proof TORX® screws,
TX 6 BO x 60 mm
ESD Series

EAN:	4013288219473	Size:	160x18x18 mm
Part number:	05030113001	Weight:	14 g
Article number:	1567 TORX® BO ESD Micro	Country of origin:	CZ
		Customs tariff number:	82054000

- Kraftform Micro screwdriver for recessed TORX® screws with safety pin
- ESD-safe tool thanks to surface resistance of $\leq 10^9 \Omega$
- Multi-component Kraftform Micro handle for fast and ergonomic screwdriving
- The Wera Black Point tip offers an exact fit and optimum corrosion protection
- Take it easy tool finder: colour coding according to profile and size
- Anti-roll feature and rotating cap for rapid twisting

ESD-safe Micro screwdriver. Dependable protection against electrostatic energy and associated damage. TORX® BO screws have a protruding pin in their drive profile. This effectively prevents any unauthorised loosening since such screws cannot be actuated with "normal" TORX® tools. Only special TORX® BO tools have a corresponding bore hole for the take-up of the pin. Rapid twisting results from fixing the hand on the rotating cap and by rotating the fast-turning zone just below. This makes time-consuming grip adjustments unnecessary. Power zones with integrated soft sections ensure the transfer of high loosening and tightening torque; a precision zone provides for the right rotation angle during fine adjustment work. The Black Point tip offers optimised corrosion protection and an exact fit.

Wera ESD Tools

The requirements for ESD-safe screwdrivers are specified in the European standard DIN EN 61340-5-1. This standard also includes a handle that has to be out of a defined conductive material. The Wera products in the ESD series satisfy these standards and the even more stringent requirements demanded by some technology companies.

High protection

The electric surface resistance of the Wera ESD material is $\leq 10^9$ ohm. This securely protects components against electrostatic energy and associated damage.

Kraftform Micro handle

Multi-component screwdriver handle for ergonomic working.

The power zone

The power zone has integrated soft zones near the blade tip to ensure high torque transfer for loosening or tightening screws without losing contact with the screw.

The fast-turning zone

The fast-turning zone just below the rotating cap allows rapid spinning.

The precision zone

The precision zone directly above the blade gives the user a better feel for the right rotation angle during fine adjustment work.

Wera Black Point tip

The Wera Black Point tip and a refined hardening process ensure long service life of the tip, improved corrosion protection and an exact fit.

Take it easy Tool Finder

Screwdrivers with Take it easy tool finder: colour coding according to profile and size stamp.
