

# **Dell E2225H/E2425H Monitor**

## User's Guide

## Notes, cautions, and warnings

 **NOTE:** A NOTE indicates important information that helps you make better use of your product.

 **CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

 **WARNING:** A WARNING indicates a potential for property damage, personal injury, or death.

# Safety instructions

Use the following safety guidelines to protect your monitor from potential damage and to ensure your personal safety. Unless otherwise noted, each procedure included in this document assumes that you have read the safety information that shipped with your monitor.

 **NOTE:** Before using the monitor, read the safety information that is shipped with your monitor and printed on the product. Keep the documentation at a secure location for future reference.

 **WARNING:** Use of controls, adjustments or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards and/or mechanical hazards.

 **CAUTION:** The possible long-term effect of listening to audio at high volume through the headphones (on monitor that support it) may cause damage to your hearing ability.

- Place the monitor on a solid surface and handle it carefully. The screen is fragile and can be damaged if dropped or hit with a sharp object.
- Ensure that your monitor is electrically rated to operate with the AC power available in your location.
- Keep the monitor in room temperature. Excessive cold or hot conditions can have an adverse effect on the liquid crystal of the display.
- Connect the power cable from the monitor to a wall outlet that is near and accessible. See [Connecting your monitor](#).
- Do not place and use the monitor on a wet surface or near water.
- Do not subject the monitor to severe vibration or high impact conditions. For example, do not place the monitor inside a car trunk.
- Unplug the monitor when it is going to be left unused for an extended period.
- To avoid electric shock, do not attempt to remove any cover or touch the inside of the monitor.
- Read these instructions carefully. Keep this document for future reference. Follow all warnings and instructions marked on product.
- Certain monitors can be wall mounted using the VESA mount that is sold separately. Ensure to use the correct VESA specifications as mentioned in the wall mounting section of the User's Guide.

For information on safety instructions, see the *Safety, Environmental and Regulatory Information (SERI)* document that is shipped with your monitor.

# About your monitor

## Package contents

The following table provides the list of components that are shipped with your monitor. If any component is missing, contact Dell. For more information, see [Contacting Dell](#).

- NOTE:** Some items may be optional and may not ship with your monitor. Some features may not be available in certain countries.
- NOTE:** To set up stand from any other source, refer to the documentation that comes with the stand for instructions.

**Table 1.** Monitor components and descriptions.

| Component image                                                                     | Component description                                                  |

# Product features

The Dell **E2225H/E2425H** flat panel monitor has an active matrix, Thin-Film Transistor (TFT), Liquid Crystal Display (LCD) panel with LED backlight. The monitor features include:

- **E2225H:** 544.85 mm (21.45 in.) viewable area display (measured diagonally). 1920 x 1080 resolution, with full-screen support for lower resolutions.
- **E2425H:** 604.70 mm (23.81 in.) viewable area display (measured diagonally). 1920 x 1080 resolution, with full-screen support for lower resolutions.
- Wide viewing angle of 178 degrees in vertical and horizontal directions.
- Contrast ratio (3000:1).
- Digital connectivity with DisplayPort.
- Support FHD @ 75 Hz.
- Plug and play capable if supported by your computer.
- On-Screen Display (OSD) adjustments for easy setup and screen optimization.
- ≤ 0.3 W in Standby mode.
- Optimize eye comfort with a flicker-free screen.
- Security-lock slot.
- Arsenic-free glass and Mercury-free panel only.
- BFR/PVC-Reduced (Its circuit boards are made from BFR/PVC-free laminates).
- Meets NFPA 99 leakage current requirement.
- TCO Certified and TCO Certified Edge.
- EPEAT registered where applicable, varies by country.  
See <https://www.epeat.net> for registration status by country.
- RoHS Compliant.
- Energy Star Certified.
- Dell ComfortView Plus is an integrated low blue light screen feature that improves eye comfort by reducing potentially harmful blue light emissions without compromising color. Through ComfortView Plus technology, Dell has reduced harmful blue light exposure from 50% to 35%. This monitor is certified with TÜV Rheinland Eye Comfort 3.0 with a 3-star rating. It incorporates key technologies that also deliver a flicker-free screen, up to 75 Hz refresh rate, a color gamut of minimum 95% sRGB. Dell ComfortView Plus feature is enabled by default on your monitor.
- This monitor uses a low blue light panel. When the monitor is reset to factory settings or default setting, it is in compliance with TÜV Rheinland's hardware low blue light certification.\*

\*This monitor is in compliance with TÜV Rheinland hardware low blue light certification under Category 3.

### Blue light ratio:

The ratio of light in the range from 415nm-455nm compared to 400nm-500nm shall be less than 50%.

**Table 2.** Blue light ratio.

| Category | Blue light ratio |
|----------|------------------|
| 1        | < 20%            |
| 2        | 20% < R < 35%    |
| 3        | 35% < R < 50%    |

- Decreases the level of hazard blue light emitted from the screen to make viewing more comfortable for your eyes without distortion of color accuracy.
- The monitor adopts Flicker-Free technology, which clears the eye visible flicker, brings comfort viewing experience and preventing users suffer from eye strain and fatigue.

### About TÜV Rheinland Eye Comfort 3.0

TÜV Rheinland Eye Comfort 3.0 certification program presents a consumer-friendly star rating scheme to the display industry promoting eye wellness from safety to eye care. Compared to existing certifications, the 5-star-rating program adds rigorous testing requirements on overall eye care attributes such as low blue-light, flicker-free, refresh rate, color gamut, color accuracy and ambient light sensor performance. It lays out requirement metrics and rates the product performance on five levels, and the sophisticated technical assessment process provides consumers and buyers with indicators that are easier to judge.

The eye wellness factors being considered remain constant, however, the standards for the various star ratings are different. The higher the star rating, the more stringent the standards. The table below lists the major eye comfort requirements which apply in addition to the basic eye comfort requirements (such as pixel density, uniformity of luminance and color, and freedom of movement).

For more information around **TÜV Eye Comfort certification** please refer to:

<https://www.tuv.com/world/en/eye-comfort.html>

**Table 3.** Eye Comfort 3.0 Requirements

| Eye Comfort 3.0 Requirements and Star Rating Scheme for Monitors |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                             |                                                                            |                                                                                                                                                                   |

| Remark                                                           | <sup>1</sup> Software controls the blue light emission by reducing excessive blue light, resulting in a more yellow tone.<br><sup>2</sup> Color gamut describes the availability of colors in the display. Various standards were developed for specific purposes. 100% corresponds to the full color space as defined in the standard.<br><sup>3</sup> NTSC stands for National Television Standards Committee, which developed a color space for the television system that is used in the United States.<br><sup>4</sup> sRGB is a standard red, green, and blue color space that is in use on monitors, printers, and the World Wide Web.<br><sup>5</sup> DCI-P3, short for Digital Cinema Initiatives - Protocol 3, is a color space used in digital cinema that encompasses a wider range of colors than the standard RGB color space.<br><sup>6</sup> Adobe RGB is a color space created by Adobe Systems that encompasses a broader range of colors than the standard RGB color model, particularly in the cyans and greens. |                                                                                             |                                                                            |                                                                                                                                                                   |

# Operating system compatibility

- Windows 10/Windows 11 and later\*
- \*The operating system compatibility on Dell and Alienware branded monitors may vary based on factors such as:
- Specific release date(s) when operating system versions, patches, or updates are available.
- Specific release date(s) when Dell and Alienware branded monitor firmware, software application, or driver updates are available on the Dell support website.

# Identifying parts and controls

## Dell Display Manager

Dell Display Manager is an application software that enhances the experience of your Dell monitor- ensuring more productivity and ease in customization.

With this application you can:

1. Adjust the monitor On Screen Display (OSD) settings such as brightness, contrast, input source setting and so on with ease. No need to toggle using the joystick on the monitor; simply use the DDM software.
  1. Organize multiple applications on your screen, snapping them into a template of your choice with the Easy Arrange.
  2. Assign applications or even files to the partitions of Easy Arrange, save the layout as a profile and then restore the profile automatically using Easy Arrange Memory.
2. Connect your Dell Monitor to multiple input sources and manage these multiple video inputs using Input source.
3. Customize each application with different color mode using Color Preset.
4. Replicate the Dell Display Manager application settings from one monitor to another monitor of the same model with Import/export application settings.

<sup>1</sup> As defined in EU 2019/2021 and EU 2019/2013.

<sup>2</sup> Max brightness and contrast setting.

<sup>3</sup> P<sub>on</sub> : Power consumption of On Mode as defined in Energy Star 8.0 version.

TEC: Total energy consumption in kWh as defined in Energy Star 8.0 version.

This document is informational only and reflects laboratory performance. Your product may perform differently, depending on the software, components, and peripherals you ordered, and shall have no obligation to update such information.

Accordingly, the customer should not rely upon this information in making decisions about electrical tolerances or otherwise. No warranty as to accuracy or completeness is expressed or implied.

**NOTE:** This monitor is ENERGY STAR certified.

This product qualifies for ENERGY STAR in the factory default settings which can be restored by **Factory Reset** function in the OSD menu. Changing the factory default settings or enabling other features may increase power consumption that could exceed the ENERGY STAR specified limit.

## Physical characteristics

**Table 12.** Physical characteristics.

## Plug and play capability

You can install the monitor in any Plug and Play-compatible system. The monitor automatically provides the computer with its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so the computer can configure itself and optimize the monitor settings. Most monitor installations are automatic, you can select different settings as required. For more information about changing the monitor settings, see [Operating your monitor](#).

## LCD monitor quality and pixel policy

During the LCD Monitor manufacturing process, it is normal for one or more pixels to become fixed in an unchanging state, which are hard to see and do not affect the display quality or usability. For more information about Dell Monitor Quality and Pixel Policy, see [www.dell.com/pixelguidelines](http://www.dell.com/pixelguidelines).

## Ergonomics

△ **CAUTION:** Improper or prolonged usage of keyboard may result in injury.

△ **CAUTION:** Viewing the monitor screen for extended periods of time may result in eye strain.

For comfort and efficiency, observe the following guidelines when setting up and using your computer workstation:

- Position your computer so that the monitor and keyboard are directly in front of you as you work. Special shelves are commercially available to help you correctly position your keyboard.
- To reduce the risk of eye strain and neck, arm, back, or shoulder pain from using the monitor for long periods of time, we recommend you to:
  - Set the distance of the screen between 20 to 28 in. (50 - 70 cm) from your eyes.
  - Blink frequently to moisten your eyes or wet your eyes with water after prolonged usage of the monitor.
  - Take regular and frequent breaks for 20 minutes every two hours.
  - Look away from your monitor and gaze at a distant object at 20 feet away for at least 20 seconds during the breaks.
  - Perform stretches to relieve tension in the neck, arm, back, and shoulders during the breaks.
- Ensure that the monitor screen is at eye level or slightly lower when you are sitting in front of the monitor.
- Adjust the tilt of the monitor, its contrast, and brightness settings.
- Adjust the ambient lighting around you (such as overhead lights, desk lamps, and the curtains or blinds on nearby windows) to minimize reflections and glare on the monitor screen.
- Use a chair that provides good lower-back support.
- Keep your forearms horizontal with your wrists in a neutral, comfortable position while using the keyboard or mouse.
- Always leave space to rest your hands while using the keyboard or mouse.
- Let your upper arms rest naturally on both sides.
- Ensure that your feet are resting flat on the floor.
- When sitting, make sure that the weight of your legs is on your feet and not on the front portion of your seat. Adjust your chair's height or use a footrest if necessary to maintain a proper posture.
- Vary your work activities. Try to organize your work so that you do not have to sit and work for extended periods of time. Try to stand or get up and walk around at regular intervals.
- Keep the area under your desk clear of obstructions and cables or power cords that may interfere with comfortable seating or present a potential trip hazard.

**Figure 8. Ergonomics or comfort and efficiency**

## Handling and Moving Your Display

To ensure the monitor is handled safely when lifting or moving it, follow the guidelines mentioned below:

- Before moving or lifting the monitor, turn off your computer and the monitor.
- Disconnect all cables from the monitor.
- Place the monitor in the original box with the original packing materials.
- Hold the bottom edge and the side of the monitor firmly without applying excessive pressure when lifting or moving the monitor.

**Figure 9. Moving or lifting the monitor**

- When lifting or moving the monitor, ensure the screen is facing away from you and do not press on the display area to avoid any scratches or damage.

**Figure 10. Ensure the screen is facing away from you**

- When transporting the monitor, avoid any sudden shock or vibration to it.
- When lifting or moving the monitor, do not turn the monitor upside down while holding the stand base or stand riser. This may result in accidental damage to the monitor or cause personal injury.

**Figure 11. Do not turn the monitor upside down**

# Maintenance guidelines

## Cleaning your monitor

 **CAUTION:** Read and follow the [Safety instructions](#) before cleaning the monitor.

 **WARNING:** Before cleaning the monitor, unplug the monitor power cable from the electrical outlet.

For best practices, follow the instructions in the list below when unpacking, cleaning, or handling your monitor:

- Use a clean cloth that is slightly dampened with water to clean the stand assembly, the screen, and the chassis of your Dell monitor. If available, use a screen-cleaning tissue or solution suitable for cleaning Dell monitors.
- After cleaning the surface of the table, ensure that it is thoroughly dry and free from any moisture or cleaning agent before placing your Dell monitor on it.
  -  **CAUTION:** Do not use detergents or other chemicals such as benzene, thinner, ammonia, abrasive cleaners, alcohol, or compressed air.
  -  **CAUTION:** Using chemicals for cleaning may cause changes in the appearance of the monitor, such as color fading, milky film on the monitor, deformation, uneven dark shade, and peeling of screen area.
  -  **WARNING:** Do not spray the cleaning solution or even water directly on the surface of the monitor. Doing so will allow liquids to accumulate at the bottom of the display panel and corrode the electronics resulting in permanent damage. Instead, apply the cleaning solution or water to a soft cloth and then clean the monitor.
  -  **NOTE:** Monitor damage due to improper cleaning methods and the use of benzene, thinner, ammonia, abrasive cleaners, alcohol, compressed air, detergent of any kind will lead to a Customer Induced Damage (CID). CID is not covered under the standard Dell warranty.
- If you notice white residual powder when you unpack your monitor, wipe it off with a cloth.
- Handle your monitor with care as a darker-colored monitor may get scratched and show white scuff marks more than a lighter-colored monitor.
- To help maintain the best image quality on your monitor, use a dynamically changing screen saver and turn off your monitor when not in use.

# Setting up the monitor

## Attaching the stand

- ① **NOTE:** The stand is not attached when the monitor is shipped from the factory.
- ① **NOTE:** The following instructions are applicable only for the stand that was shipped with your monitor. If you are attaching a stand that you purchased from any other source, follow the setup instructions that were included with the stand.

To attach the monitor stand:

1. Assemble the stand riser to stand base.
  - a. Place the monitor stand base on a stable table top.
  - b. Slide the monitor stand body in the correct direction down onto the stand base until it clicks into place.

**Figure 12. Assemble the stand**

2. Attach the stand assembly to the monitor.
  - a. Place the monitor on a soft cloth or cushion near the edge of the desk.
  - b. Align the stand assembly bracket to the monitor groove.
  - c. Insert the bracket towards monitor until it locks in place.
  - d. Attach VESA cover.

**Figure 13. Attach the stand**

## Connecting your monitor

- ⚠ WARNING:** Before you begin any of the procedures in this section, follow the [Safety instructions](#).
- ⚠ WARNING:** For your safety, be sure that the grounded power outlet you plug the power cord into easily accessible to operator and located as close to the equipment as possible.  
To disconnect power from the equipment, unplug the power cord from the power outlet by grasping the plug firmly. Never pull on the cord.
- ⚠ WARNING:** A certified power supply cord has to be used with this equipment. The relevant national installation and/or equipment regulations shall be considered. A certified power supply cord not lighter than ordinary polyvinyl chloride flexible cord according to IEC 60227 (designation H05VV-F 3G 0.75 mm<sup>2</sup> or H05VVH2-F2 3G 0.75 mm<sup>2</sup>) shall be used. An alternative flexible cord is synthetic rubber.
- ℹ NOTE:** Do not connect all cables to the computer at the same time. It is recommended to route the cables through the cable-management slot before you connect them to the monitor.
- ℹ NOTE:** Dell monitors are designed to work optimally with Dell-supplied inbox cables. Dell does not guarantee the video quality and performance if non-Dell cables are used.

To connect your monitor to the computer:

1. Turn off your computer and disconnect the power cable.
2. Connect the VGA or DP cable from your monitor to the computer.

### Connecting VGA cable

Figure 14. Connecting VGA cable

### Connecting DP cable

Figure 15. Connecting DP cable

## Organizing cables

Use the cable-management clip to route the cables connected to your monitor.

**Figure 16.** Organizing cables

## Securing your monitor using Kensington lock (optional)

The security-lock slot is located at the bottom of the monitor (see [Security-lock slot](#)). Secure your monitor to a table using the Kensington security lock.

For more information on using the Kensington lock (sold separately), see the documentation that is shipped with the lock.

**Figure 17.** Using Kensington lock

**NOTE:** The image is for the purpose of illustration only. The appearance of the lock may vary.

## Removing the monitor stand

- ① **NOTE:** To prevent scratches on the LCD screen when removing the stand, ensure that the monitor is placed on a soft surface and handle it carefully.
- ① **NOTE:** The following instructions are applicable only for the stand that was shipped with your monitor. If you are removing a stand that you purchased from any other source, follow the setup instructions that are included with the stand.
- ① **NOTE:** Before removing the stand, ensure that you have disconnected all the cables from the monitor.

### To remove the stand

1. Place the monitor on a soft cloth along the desk.

**Figure 18.** Place the monitor on the desk

2. Use a long and thin screwdriver to push the released button.

**Figure 19.** Push the release button

3. While keeping the release button pressed, pull the stand out from the monitor. Then press the quick release tab on the bottom of the base, to separate the stand base from the stand riser.

**Figure 20.** Remove the stand

## To remove the VESA cover

Press the rift on the VESA cover to release it from the back of the display.

**Figure 21.** Press the rift to remove VESA cover

## VESA wall mounting (optional)

**Figure 22. VESA wall mounting**

**NOTE:** Use M4 x 10 mm screws to connect the monitor to the wall-mounting kit.

Refer to the instructions that come with the VESA-compatible base mounting kit.

1. Place the monitor panel on a soft cloth or cushion on a stable flat table.
2. Remove the stand. For more information, see [Removing the monitor stand](#).
3. Use a screwdriver to remove the four screws securing the plastic cover.
4. Attach the mounting bracket from the wall mounting kit to the monitor.
5. Mount the monitor on the wall. For more information, see the documentation that is shipped with the wall mounting kit.

**NOTE:** For use only with UL or CSA or GS-listed wall-mount bracket with minimum weight/load bearing capacity of 9.36 kg (20.63 lb) for E2225H, 12.64 kg (27.86 lb) for E2425H.

## Using tilt

You can tilt the monitor for the most comfortable viewing angle.

**NOTE:** The stand is not attached when the monitor is shipped from the factory.

**Figure 23. Tilt adjustment**

# Operating your monitor

## Power on the monitor

Press the  button to turn on the monitor.

Figure 24. Turn on the monitor

## Using the front panel controls

Use the control buttons at the bottom edge of the monitor to adjust the image being displayed.

Figure 25. Front panel controls

The following table describes the control buttons:

Table 16. Control buttons description.

|   | Control buttons                                                                                                                  | Description                                                                                                                                                                               |
|---|----------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <br>Preset mode                               | Use this button to choose from a list of preset modes.                                                                                                                                    |
| 2 | <br>Brightness/Contrast                       | For direct access to the Brightness and Contrast menu.                                                                                                                                    |
| 3 | <br>Menu                                      | To launch the On-Screen Display (OSD) menu, or to access the list of items/options of a menu item. For more information, see <a href="#">Accessing the OSD menu</a> .                     |
| 4 | <br>Exit                                      | To exit or return to the OSD main menu.                                                                                                                                                   |
| 5 | <br>Power button<br>(with power-status light) | To turn the monitor on or off.<br>Solid white light indicates that the monitor is turned on and functioning normally. Blinking white light indicates that the monitor is in Standby Mode. |

## Using the OSD lock function

You can lock the front-panel control buttons to prevent access to the OSD menu and power button.

### Use the Lock menu to lock the button(s)

1. Select one of the following options.

**Figure 26.** Select OSD main menu

2. When the following message appears, select **Yes** to lock the buttons. Once locked, pressing any control button will display the lock icon .

**Figure 27.** Lock Menu buttons prompt message

Use the front-panel control button to lock the button(s)

Figure 28. Front-panel control button

1. Press and hold Button 4 for four seconds, a menu appears on the screen.

Figure 29. Option for Menu buttons lock

2. Select one of the following options:

Table 17. Lock buttons description.

|   | Options                                                                                                            | Description                                                                                    |
|---|--------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|

| 1 | <br>Up     | Use the Up button to increase values or move up in a menu.     |
| 2 | <br>Down   | Use the Down button to decrease values or move down in a menu. |
| 3 | <br>OK    | Use the OK button to confirm your selection in a menu.         |
| 4 | <br>Back | Use the Back button to go back to the previous menu.           |

# Using the On-Screen Display (OSD) menu

## Accessing the OSD menu

**NOTE:** Any changes you make are automatically saved when you move to another menu, exit the OSD menu, or wait for the OSD menu to close automatically.

1. Press the  button to display the OSD main menu.

**Figure 32.** OSD main menu

2. Press the  and  buttons to move between the setting options. As you move from one icon to another, the option name is highlighted.
3. Press the  button once to activate the highlighted option.
4. Press  and  button to select the desired parameter.
5. Press  and then use the  and  buttons, according to the indicators on the menu, to make your changes.
6. Select the  button going back to previous menu.

## OSD warning messages

The following power warning message box applies to brightness functions for the first time when you adjust the brightness level above the default level.

**Figure 33. Power warning message**

Before the lock function is activated, the following message is displayed.

**Figure 34. Lock function warning message**

**NOTE:** The message may be slightly different according to the selected settings.  
Before the DDC/CI function is disabled, the following message is displayed.

**Figure 35. DDC/CI warning message**

When the monitor enters Standby mode, the following message appears.

**Figure 36. Standby mode warning message**

If VGA or DP cable is not connected, a floating dialog box appears. The monitor will enter Standby mode after 4 minutes if left at this state.

**Figure 37. VGA cable disconnected warning message**

**Figure 38. DP cable disconnected warning message**

For more information, see [Troubleshooting](#).

## Setting the maximum resolution

 **NOTE:** The steps may vary slightly depending on the version of Windows you have.

To set the maximum resolution for the monitor:

In Windows 10 and Windows 11:

1. Right-click on the desktop and click **Display settings**.
2. If you have more than one monitor connected, ensure that you select **E2225H/E2425H**.
3. Click the **Display settings** drop-down list and select **1920 x 1080**.
4. Click **Keep changes**.

If you do not see 1920 x 1080 as an option, you must update your graphics driver to the latest version. Depending on your computer, complete one of the following procedures:

If you have a Dell desktop or laptop:

- Go to [www.dell.com/support](http://www.dell.com/support), enter your service tag, and download the latest driver for your graphics card.

If you are using a non-Dell computer (laptop or desktop):

- Go to the support site for your non-Dell computer and download the latest graphic card drivers.
- Go to the graphics card's website and download the latest graphic card drivers.

# Troubleshooting

**⚠ WARNING:** Before you begin any of the procedures in this section, follow the [Safety instructions](#).

## Self-test

Your monitor provides a self-test feature that allows you to check if your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

1. Turn off both your computer and the monitor.
2. Disconnect all video cables from the monitor. To ensure proper self-test operation, remove all digital cables from the back of computer.
3. Turn on the monitor.

**ⓘ NOTE:** A dialog box should appear on-screen (against a black background), if the monitor cannot sense a video signal and is working correctly. While in self-test mode, the power LED remains white.

**Figure 39. VGA cable disconnected warning message**

**Figure 40. DP cable disconnected warning message**

**ⓘ NOTE:** This message also appears during normal operation, when the video cable is disconnected or damaged.

4. Turn off your monitor and reconnect the video cable; then turn on your computer and the monitor.

If your monitor screen remains blank after you perform the previous procedure, check your video controller and computer, because your monitor is functioning properly.

# Built-in diagnostics

Your monitor has a built-in diagnostic tool that helps you determine if any screen abnormality you experience is an inherent problem with your monitor, or with your computer and video card.

**Figure 41.** Built-in diagnostics function buttons

**Table 21.** Label description.

| Label | Description |
|-------|-------------|
| 1     | Button 1    |
| 2     | Button 2    |
| 3     | Button 3    |
| 4     | Button 4    |

To run the built-in diagnostics:

1. Ensure that the screen is clean (no dust particles on the surface of the screen).
2. Press and hold **Button 4** for about 4 seconds and wait for a pop-up menu.
3. Use **Button 1** or **2** to select the  and press  to confirm.  
A gray test pattern appears at the beginning of the diagnostic program.
4. Carefully inspect the screen for abnormalities.
5. Press **Button 1** to change the test patterns.
6. Repeat steps 4 and 5 to inspect the display in red, green, blue, black, white, and text screens.
7. When in white color test screen, check for white color uniformity and if there white color appears greenish/reddish and so on.
8. Press **Button 1** to end the diagnostic program.

## Common problems

The following table provides general information about common monitor problems you might encounter and the possible solutions:

**Table 22.** Common problems and solutions.

| Common symptoms           | Possible solutions                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| No video/Power LED off    | <ul style="list-style-type: none"> <li>Ensure that the video cable connecting the monitor and the computer is properly connected and secure.</li> <li>Verify that the power outlet is functioning properly using any other electrical equipment.</li> <li>Ensure that the power button is pressed.</li> <li>Ensure that the correct input source is selected via the <a href="#">Input Source</a> menu.</li> </ul> |
| No video/Power LED on     | <ul style="list-style-type: none"> <li>Increase brightness and contrast controls using the OSD.</li> <li>Perform monitor self-test feature check.</li> <li>Check for bent or broken pins in the video cable connector.</li> <li>Run the built-in diagnostics.</li> <li>Ensure that the correct input source is selected via the <a href="#">Input Source</a> menu.</li> </ul>                                      |
