Normal TORX

TORX with Borehole

Tamper-proof (Tamper-resistant) Torx screws are used in places where screws must not be easily loosened for the purpose of device security, maintenance, and accident preventions, etc. Please ensure safety before each use and EIGHT TOOL takes no responsibility for any accidents caused by improper or malicious use of our wrenches.

※Pack packaging is also available.

As tamper-proof (Tamper-resistant) Torx screws are often custom-made products, there are occasionally types of screws that have larger protrusions. Please note that EIGHT TOOL borehole Torx wrenches do not support such screws.
