NEW

Great for tightening work in confined spaces. Improve work efficiency by using ring part for strong force, and ratchet ring part for fast turning. Since both heads are offset on one side, it can also be used for bolts/nuts in the counter bore.

RMA-13L

Flex head

Most suitable for tight space.

Offset on both head.
Possible to apply on bolt/nut even with counterbore!

CAUTION

- Due to the long length, output torque tends to be high even if applied torque is low. Do not apply excessive force when tightening bolts.
- Switch over the direction completely.
